

Get base url using javascript

```
function baseUrl(){
    var getUrl = window.location;
    var baseUrl = getUrl .protocol + "://" + getUrl.host;
    var words = getUrl.pathname.split('/');
    var count = words.length - 3;
    if (count > 0)
    {
        for (i = 1; i <= count; i++) {
            baseUrl += "/";
            baseUrl += words[i];
        }
    }
    return baseUrl;
}
```
